Brief Biography (200 words or less):

Doug Vernier is President of V-Soft Communications and Senior Engineer of V-Soft's telecommunications consulting division. V-Soft Communications designs propagation and allocation software used by Industry technicians, consultants and FCC engineers. Doug has a long history with public radio as the first manager of WMOT, Murfreesboro, Tennessee and later as the director of broadcasting of the University of Northern Iowa's group of stations. He has served two terms on the NPR Board of Directors and is CPB's technical consultant for the HD conversion radio program. Recently, Doug authored the chapter on radio propagation included in the NAB Engineering Handbook.
